

Oztrail Rapid Tyre Deflator

~~\$62.99~~ **\$44.90**

Details

Driving without the correct tyre pressure can be inefficient and dangerous, not to mention bad for your tyres. On your next 4WD adventure, bring along the Rapid Tyre Deflator from Oztrail to make deflation of your tyres in preparation for soft or rocky roads an easy task.

This deflator has an easy to read dial, with a rubber housing to protect it. You can easily remove the valve core for fast and accurate deflation, and the bronze bourdon tube gauge provides accuracy with 1 PSI increments. A valve removal tool is integrated into the rapid tyre deflator, removing the valve and re-instating it whilst attached to the tyre, allowing quick deflation and accurate measurement of tyre pressure.

With the Rapid Tyre Deflator from Oztrail in your kit, you can obtain the ideal tyre pressure for your 4WD in no time at all.

Allows for easy removal of the valve core for quick and accurate tyre deflation
Bronze Bourdon tube gear driven gauge
1 PSI increments
Easy to read dial gauge with protective rubber housing
Protective carry pouch included

Specifications
