

## Sea to Summit Altitude At2 Wmn's Sleeping Bag (-10 °C)

**From \$490.99**

**Available sizes:**

Regular - Right Zipper | Long - Right Zipper

### Details

Adapt your sleeping set up according to the weather conditions, with the versatile and reliable Altitude At2 Sleeping Bag from Sea to Summit.

This sleeping bag is wider at the hips and narrower at the shoulders for a women's specific fit and features a rectangular design which is roomier than a mummy shape. To keep the weight and packed size down, the shell and lining are made from light breathable while the vertical chest baffles help prevent cold spots and down migration. The fill is RDS certified 750+ ultra-dry down which provides superior insulation, and the foot area has THERMOLITE synthetic panels to prevent your ankles and feet getting cold.

With a -10°C comfort rating and -17°C lower limit, the Altitude At2 can be used for your cold-weather expeditions. It's easy to get extra ventilation on a warm night or keep cosy when the temperature drops as this bag has a Free-Flow triple-zip design. This means there's a half zip on the left to free up your arms or fold it down, and a full-length two-way side zip and separate foot zip on the other side so you can use it as a quilt. When it's chilly, just close up the zips and burrow down into the generously sized hood.

It's also simple to keep your phone or headtorch accessible as the Altitude has a large internal pocket for valuables. You'll be prepared for changing weather conditions, with the comfy yet adjustable Altitude At2 Sleeping Bag from Sea to Summit.

- 10°C comfort rating, -17°C lower limit
- Tapered rectangular women's specific design with wider hips and narrower shoulders
- Free-Flow triple-zip design for adaptability
- Half zip on the left and full-length two-way side zip and separate foot zip
- Super light nylon shell and lining
- High-quality RDS certified 750+ Loft ULTRA-DRY Down for insulation
- Oversized draft tubes prevent body heat escaping
- Panelled footbox and 3D hood
- Extra down overall and THERMOLITE panels under the foot area
- Vertical baffles over the chest to prevent cold spots
- Large internal security pocket
- Storage cell and a lightweight compression bag for storage
- LH and RH bags zip together
